SUMMARY

BSc in Computer Science and Artificial Intelligence student with a strong foundation in Big Data Analytics and hands-on experience across software development, data analytics, and AI/ML. Currently gaining industry experience as a Software Development Intern at Island Digital Solutions Ltd, working with .NET and ASP.NET Web API while developing practical skills in modern software engineering. Comfortable working with Python, SQL, Power BI, and machine learning technologies, with experience applying these skills through academic and practical projects.
A curious and adaptable learner who enjoys solving problems, building practical solutions, and continuously developing both technical and analytical skills.

WORK EXPERIENCE

IT - Intern Software Development *Sep 2026 - Present*

Island Digital Solutions Ltd - Cybercity, Ebene

- Backend Development using ASP.NET Web API - C#
- Frontend Development with Angular and Bootstrap - HTML, TypeScript, SCSS
- Git Fundamentals
- QA Fundamentals

IT Support *Sep 2025 - Mar 2026*

Mauritius IT Services Ltd - Pailles, Port Louis

- Provide technical support for hardware, software, and basic network-related issues
- Support users both onsite and remotely (VPN, Remote Desktop, etc.)
- Design, develop, and maintain interactive dashboards using Power BI
- Extract, transform, Load (ETL) processes to analyze data using SQL Server (T-SQL)
- Ensure data accuracy, consistency, and integrity across reports
- Create data models, measures (DAX), and visualizations aligned with business requirements

Trainee - IOT Technician *May 2024 - Sep 2024*

Ocean IoT Solutions Ltd - Curepipe, Mauritius

- Installing and configuring IoT devices and sensor units
- Troubleshooting technical issues with IoT devices, networks, and data connectivity
- Monitoring and analyzing data from IoT devices to identify trends and areas for improvement

Intern - Site Supervisor *Apr 2024 - May 2024*

Global Network Technologies Ltd - Ebene, Quatre Bornes

- Oversee day-to-day operations of a worksite.
- Manage and coordinate crew members, subcontractors, and deliveries.
- Monitor project progress and identify/resolve any issues.
- Conduct safety inspections and enforce safety protocols.

EDUCATION

BSc (Hons) Computer Science and Artificial Intelligence (Top-up) *May 2026 - Present*

Mauritius Institute of Computing / National Polytechnic Institute

- Mobile Application Development
- Advanced Data Modelling
- Applied AI and Machine Learning

Diploma in Emerging Technologies (Big Data) *Apr 2023 - Sep 2025*

Institute of Emerging Technologies / National Polytechnic Institute

- CPA: 74.0% Relevant Modules: Python Methodology 1 and 2, IoT Design principles, AI with Machine Learning, Cloud Computing and Techniques, Big Data Query and Analytics, Mobile Communication System Architecture
- Achievement: Academic Merit Award

SKILLS

Languages	Python, R, C#, HTML, TypeScript
Tools/Frameworks	Power BI, Microsoft Excel, IoT, ASP.NET, Angular, Bootstrap
Databases	Microsoft SQL Server, SQLite, MySQL, MongoDB
Other Skills	Data Analysis, Communication, Problem Solving, Agile Methodology

CERTIFICATES

- 5G Fundamentals (Udemy) - April 2024
- Python Essentials 1 (Cisco Skills for All) - Jan 2024
- Introduction to Data Science (Cisco Skills for All) - Dec 2023
- Introduction to IoT (Cisco Skills for All) - Oct 2023
